

Complete this activity after watching [the animation "A Mechanism of Evolution: Natural Selection."](#)

In a half-page response, answer the following items:

- Identify three key pieces of information about evolution, natural selection, and evolutionary processes.
- What information about evolution and natural selection did the animation help you better understand?
- If you had to explain to someone else what evolution by natural selection is and why it is such an important biological concept, what would you say?
